

We have been using NIP since 2012 and have been very satisfied with the quality and speed of their services. Great drafting services at a great price. They've saved me time and money. Definitely recommend to anyone.

I hired NIP to model and detail a complex architectural building in Melbourne, Australia. The total project value was \$15M AUD, but I quickly gained confidence in their technical abilities and professionalism. The design was plagued with design issues at the architectural level, but Radu and his team put in a solid effort to rectify a vast number of these. Cheers guys
